Natural gas futures turn lower after hitting 7-week high

U.S. natural gas prices rallied to a seven-week peak on Monday, before turning lower as forecasts for mild weather across the U.S. in the week ahead dampened near-term demand expectations for the fuel.

China's new monetary tool: quantitative teasing

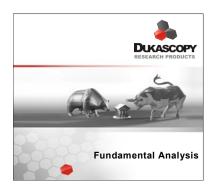

While Europe eases, China merely teases. The People's Republic cut interest rates on May 10 for the third time in six months, responding to poor economic data and a corporate sector saddled with high debt.

Tim Collard

▶ British election: business as usual, predictably

The outside world does not expect too much of a British general election these days. Not only do we no longer cut the figure in the world that we once did, but it is also true that foreign policy is not really a great bone of...
