

Are these messages causing serious problems? At the moment the Multi-Trailer seems to work properly. I guess the reason for that message is the fact, that there are now two trailers but only one of them is actually processing data.

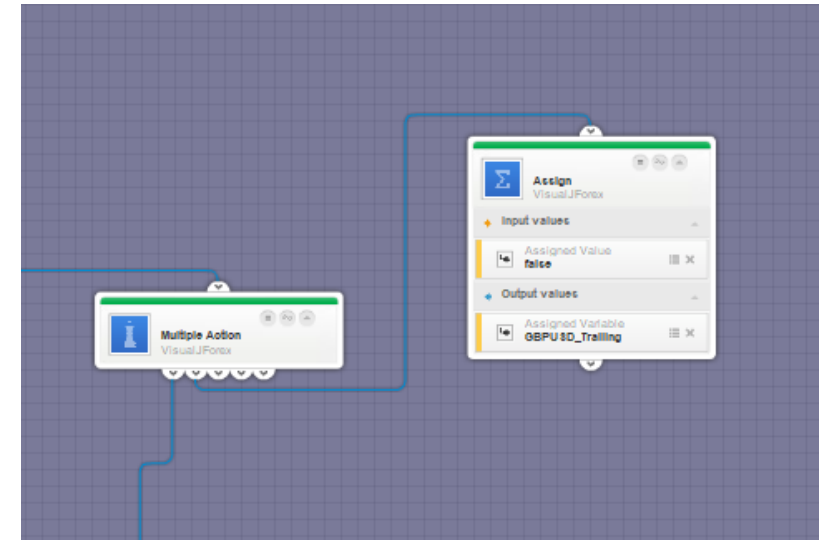

**Trailing Logic A
(Short)**

**Trailing Logic A
(Long)**

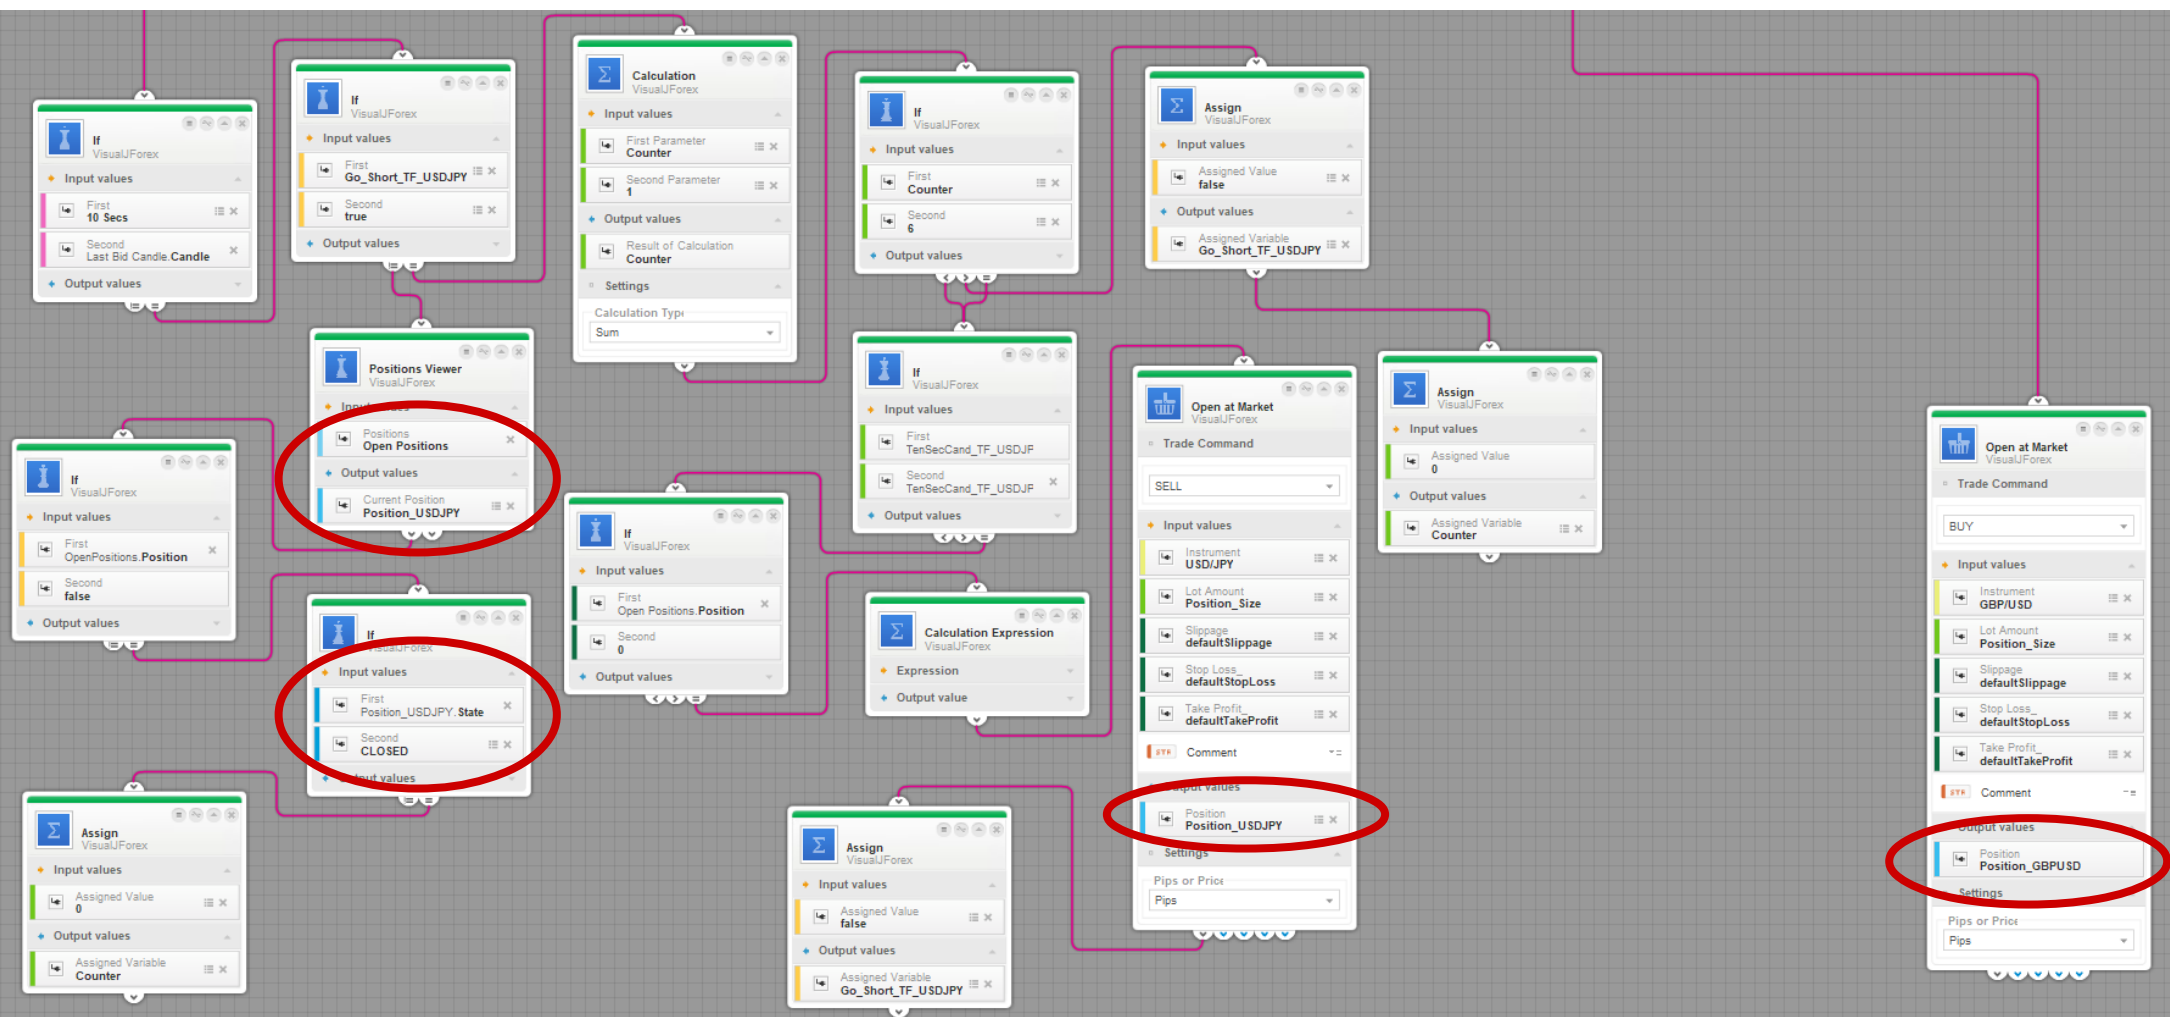

**Trailing Logic B
(Short)**

**Trailing Logic B
(Long)**

**The necessary adjustment in
„Trade Event“: One more
„Assign“ block added.**

**Is this a proper way to work
with two exit strategies or is a
„Positions Viewer“ necessary?**

The strategy is supposed to use a certain trailer for every entry signal – are there any more adjustments necessary?
